

Turnkey Claim Payment Efficiency

Consolidated electronic claim payments to expedite revenue and reduce administrative burden

It's never been harder to achieve revenue cycle goals. With razor-thin margins caused by increasing overhead costs and decreasing reimbursements, you are using every lever available to keep care flowing. Many revenue cycle leaders have shifted their focus toward better managing denials and increasing patient collections to increase revenue.

The problem is they are not solving the upstream inefficiencies causing:

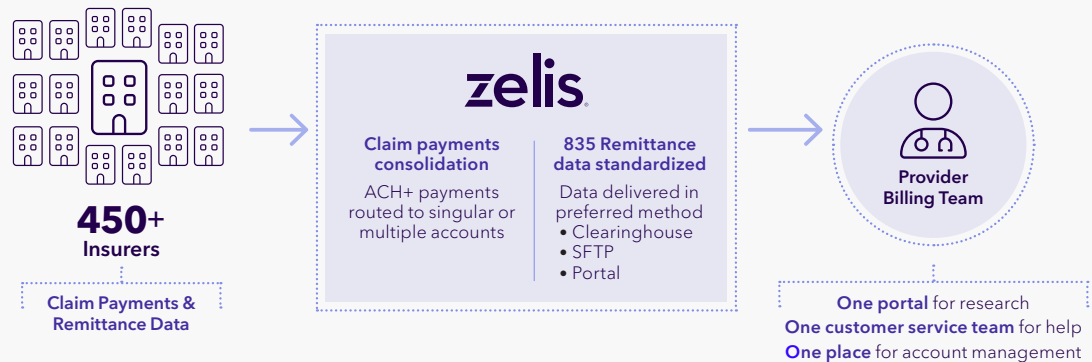

- unprocessed payment backlogs
- delayed denials processing
- delayed or inaccurate patient bills

What if you could improve the efficiency and speed of your claim payment process with little to no technical resources freeing up your staff to focus on strategic revenue generating activities?

Remove the complexities of the claim payments bottleneck from your workflow with Zelis

The Power of Enrolling in the Zelis Payments Network

Improved Productivity

Maximize your team's time with a single point of access to consolidated electronic payments and data from an ever-growing network of 450+ payers. Reduce the number of hurdles that your staff must manage across payers:

- remove check processing
- eliminate risk associated with multiple EFT portals
- minimize time spent making account changes

Faster, More Accurate Payments & Data

Modernize your claim payment process with reliable ACH+ payments and accurate 835 data pulled directly from the payer's system, accelerating your time-to-cash-on-hand while sustaining the levels of accuracy, transparency and security you need so you can:

- send accurate, timely bills to your patients
- pay your staff
- invest in your business for future growth
